

Strength Through Preparation

Fire Risk Consultants offer a range of operational and strategic services in the bushfire risk reduction sector specialising in the Tasmanian built and natural environment.

Our services include bushfire protection planning for built and natural assets, bushfire fuel management plans and strategies, monitoring and assessments, provision of bushfire risk advice, Nationally Accredited Emergency Management Training, specification writing, project management and delivery of on-ground works.

Bushfire Planning

- » Bushfire planning and risk management advice
- » Bushfire Attack Level (BAL) Assessments
- » Bushfire Mitigation Strategies – preparation and reviews
- » Reserve and natural area Bushfire Mitigation Plans
- » Bushfire fuel management (vegetation) strategies including:
 - ◇ Burn planning
 - ◇ Specification writing for fire trail works
 - ◇ Mechanical works design including hazard management areas, fuel breaks, asset protection zones, and fuels adjacent to fire trails

Monitoring and Assessments

- » Condition assessment audits of fire trails, hazard management areas, asset protection zones and fuel breaks
- » Overall fuel hazard assessments
- » Vegetation condition assessment monitoring
- » Photo point monitoring
- » Skills and training gap analysis

Project Management & On-ground Works

- » On-ground vegetation management projects from planning through to delivery of works including fire trail maintenance/upgrade and mechanical fuel reduction
- » Facilitation of community engagement events/forums to enhance bushfire awareness and develop bushfire resilient communities

Emergency Management Training

- » Development and delivery of tailored land & fire management programs including Nationally Accredited Training to stakeholder Land Managers, agencies, organisations and Traditional Owner Groups

Partnership

- » At Fire Risk Consultants we encourage open and collaborative participation with all our clients in the development and delivery of risk management solutions. We aim to operate as an extended arm of your business partnering with you to achieve results. Our senior team members have worked in large organisations and understand the importance of management processes and competing priorities
- » Our goal is to provide you with a service delivery solution that is cost effective to help you achieve your desired outcomes

Rob Whittle | Senior Consultant Bushfire Risk & Tasmanian Projects Lead

Rob Whittle is an experienced land and forest fire management practitioner with over 15 years' experience working in leadership roles including strategic land management, strategic business planning and communication, project management, planned burning, mechanical fuel reduction, fire trail management, training, forest assessment, and specialised community engagement.

Rob gained much of his experience working within the Tasmanian forestry industry and over 10 years within Local Government and has held management roles within Local Government, the State-Government's Fuel Reduction Program, and the State Fire Management Council.

Rob has a strong passion and knowledge of forest and fire management and has extensive experience working within the State Government's bushfire planning framework and Local Government's asset management systems.

Rob is known for his mechanical works planning and works implementation and extensive collaboration with stakeholders to achieve strategic outcomes whilst balancing bushfire risk reduction and maintaining ecological values.

We provide 24/7 service capability to support your requirements.

EXCELLENCE

We possess the skills and attributes of fire industry professionals and we will always act in a professional manner, as an example of fire industry experience.

INTEGRITY

We will always act with integrity.

HONESTY

We will always be honest and will not compromise the truth.

SERVICE DELIVERY

We will continually give the best advice and world class service. We will endeavour to achieve excellence with every opportunity.

COURAGE

We will accept work that is difficult and challenging, including work that others fear to challenge themselves with. We will provide support to those that require it.
